

Aluminium Extrusion RFQ Checklist

Custom profiles: die, extrusion, machining and finish — what to send.

1. Profile

- Section drawing (DXF ideal) or sample
- Alloy + temper (6063-T5 default)
- Cut lengths + tolerance
- Straightness/twist criticality

2. Operations

- Machining: holes, taps, milled ends
- Finish: anodise colour / brush / powder RAL
- Assembly or kitting needs

3. Commercial

- Annual volume + call-off pattern
- First-article and production dates
- Existing profile to match? Send the drawing or a 100 mm sample

Send this with your files via the quote form, or email support@pa-international.com.au. One dedicated engineer replies with engineering feedback and itemised pricing.
