

Aluminium Process Selection Checklist

Extrude, cast, fabricate or machine? What the route comparison needs.

1. The part

- Drawing or sample + what it does
- Loads, heat, environment, cosmetics
- Weight or cost target if any

2. Volumes

- Annual quantity + program life
- Ramp profile
- Current process + piece cost if it exists

3. Constraints

- Finish and colour-matching needs
- Assembly it must fit
- Certifications your industry requires

Send this with your files via the quote form, or email support@pa-international.com.au. One dedicated engineer replies with engineering feedback and itemised pricing.
