

Extrusion Program Checklist

Second-sourcing or running a profile program — the qualification pack.

1. Current state

- Profile drawings + master samples
- Current supplier problems (drift, colour, delivery)
- Die ownership status

2. Qualification

- First-article correlation plan
- Anodise/powder master-sample sign-off
- Die wear / replacement planning

3. Supply

- Annual volume + call-off pattern
- Buffer stock expectations
- Quality data wanted with each batch

Send this with your files via the quote form, or email support@pa-international.com.au. One dedicated engineer replies with engineering feedback and itemised pricing.
