

Manufacturer Qualification Overview

How a line earns — and keeps — a place in the PA partner network.

1. Entry audit

- Process capability seen live, not brochured
- Quality system: ISO 9000+ verified, calibration, NCRs
- Capacity and stability signals

2. Trial placement

- Supervised non-critical work first
- Measured results vs drawing
- Communication quality assessed

3. Standing review

- Batch-level quality tracking
- Corrective action on drift
- Replacement managed without supply gaps

Send via the quote form, or email support@pa-international.com.au. One dedicated engineer replies with engineering feedback and itemised pricing.
