

Plastic Moulding RFQ Checklist

Everything an engineer needs to quote your moulding project fast.

1. Minimum to quote

- STEP/IGES model
- Annual quantity
- Resin if known (or what the part must survive)

2. Sharpens the price

- 2D drawing with tolerances
- Cosmetic spec: texture, gloss, paint
- Hardware inserts or overmoulding details
- Existing tool details for transfers

3. Commercial

- Target dates
- Delivery terms and destination
- NDA first? Just ask.

Send this with your files via the quote form, or email support@pa-international.com.au. One dedicated engineer replies with DFM feedback and itemised pricing.
